

THE NEW 14" DIAMOND[®] CUTTER

**DON'T BUY 70 ABRASIVES
BUY 1 DIAMOND[®] CUTTER**

The all-new **14" Diamond[®] Cutter** is the most advanced, versatile and powerful **Diamond[®]** blade we've ever created. We've made advancements to our brazing technology to increase the speed and longevity of the blade. The higher quality diamonds are bonded to the steel core with a level of precision that is simply unmatched in the industry.

Designed for use on high speed gasoline cutoff saws and higher-powered chop saws, the **14" Diamond[®] Cutter** will slice through steel, stainless steel, rebar, structural steel and bolts with ease. The **14" Diamond[®] Cutter** will make more cuts than up to 70 conventional abrasive wheels*, greatly increasing the productivity by reducing the downtime associated with changing out worn abrasives.

Like all **Diamond[®]** products, the new **14" Diamond[®] Cutter** is much safer and more eco-friendly than abrasives. The tools are made of steel and diamonds, which retain their shape, cut after cut. The steel core is virtually indestructible, providing a much safer working environment when compared to conventional abrasives that can fracture & break. Sparks, odor and debris are all greatly reduced, improving working conditions for the operator.

Size	Item Code	Description
14"	DXH0120P1415E	14" x .150 x 1/20mm.

Applications

Steel, Stainless Steel, Rebar, Studs, Bolts, Pipe, Sectional Tubing

**THIS IS THE FUTURE.
THIS IS THE NEW 14" DIAMOND[®] CUTTER.**

*Based on manufacturer's test. Actual user results may vary depending on various factors, namely application, machine and the manner of operation.
